

FIRE DEPARTMENT INFO #4

Help Us Help You!

Additional revenue would be used to replace out-dated and unsafe personal protection equipment (PPEs).

We currently have 10 of 12 air packs that will be placed out of service in the next two years. These air packs cost \$6000 each.

We also face challenges with turn out gear (TOG) the firefighters wear into burning buildings. A little known fact, the fire retardant qualities diminish as they age and are considered unsafe after 10 years. We received a grant 3 years ago and received 5 new sets of TOG. This new gear was custom fit and 3 of those people are no longer on staff. All of the other gear is nearing their end of life. Even this new gear may not properly fit our staff

**AND STILL THEY RUN INTO
THE BURNING BUILDING!**

Help us help you!
